

GREENCONNECT

EXPERT CONSTRUCTION, INNOVATIVE SOLUTIONS

Capability Statement

Expert Construction & Innovative Solutions

Green Connect is a modern, proudly South Australian Electrical Services business. We blend the best elements of traditional service, knowledge, and trust with technology to deliver an exceptional client experience on every project.

We specialise in complex challenging projects that require vision, transparency, and expertise to get them right.

Our management team is our key point of difference; we engage highly skilled team members with vision, knowledge, and integrity. We continue to invest in developing our management team by providing specialised training to keep up with the evolution of technology in our field of work.

Our clients benefit from more than just knowledge and a specialised skillset onsite, they benefit from having a skilfully developed, well trained, and safety-focused team dedicated to the successful delivery of their project.

A man with a beard, wearing a white hard hat and a high-visibility yellow safety vest over a dark blue shirt, is working on electrical wiring. He is using a pair of pliers to strip or cut a yellow cable. He is standing on a yellow and silver step ladder. The background is a plain, light-colored wall with some black cables bundled together on the right side.

Industry Leaders Providing Sustainable Electrical Installations

In short, we offer turn-key solutions designed for long-term sustainability.

Our expertise spans the delivery of tier 2 and tier 3 construction projects, covering everything from Design & Construct services to infrastructure development and ongoing maintenance programs. With a team of highly experienced professionals, we specialize in providing expert construction and innovative solutions tailored to diverse industries.:

- Highly experienced in Large Warehousing, Medical & Healthcare, Winery/Architectural, Multistorey Developments, Education/Childcare & Fit out/Refurbishment projects
- Complete turn-key Design & Construct services (including detailed design) for electrical installations
- Low Voltage reticulation/distribution, including design switching, testing, and commissioning
- Process control and automation, including SCADA, PLC's, Dynalite, DALI, KNX, CBUS, as a brief listing
- Preventative and Specialist electrical services capability
- Statutory testing & audits, including asset capture, compliance & QA certification

Traditional Values Meeting Modern Technology

At Green Connect we appreciate the impact that contractor selection can have on both the project and business.

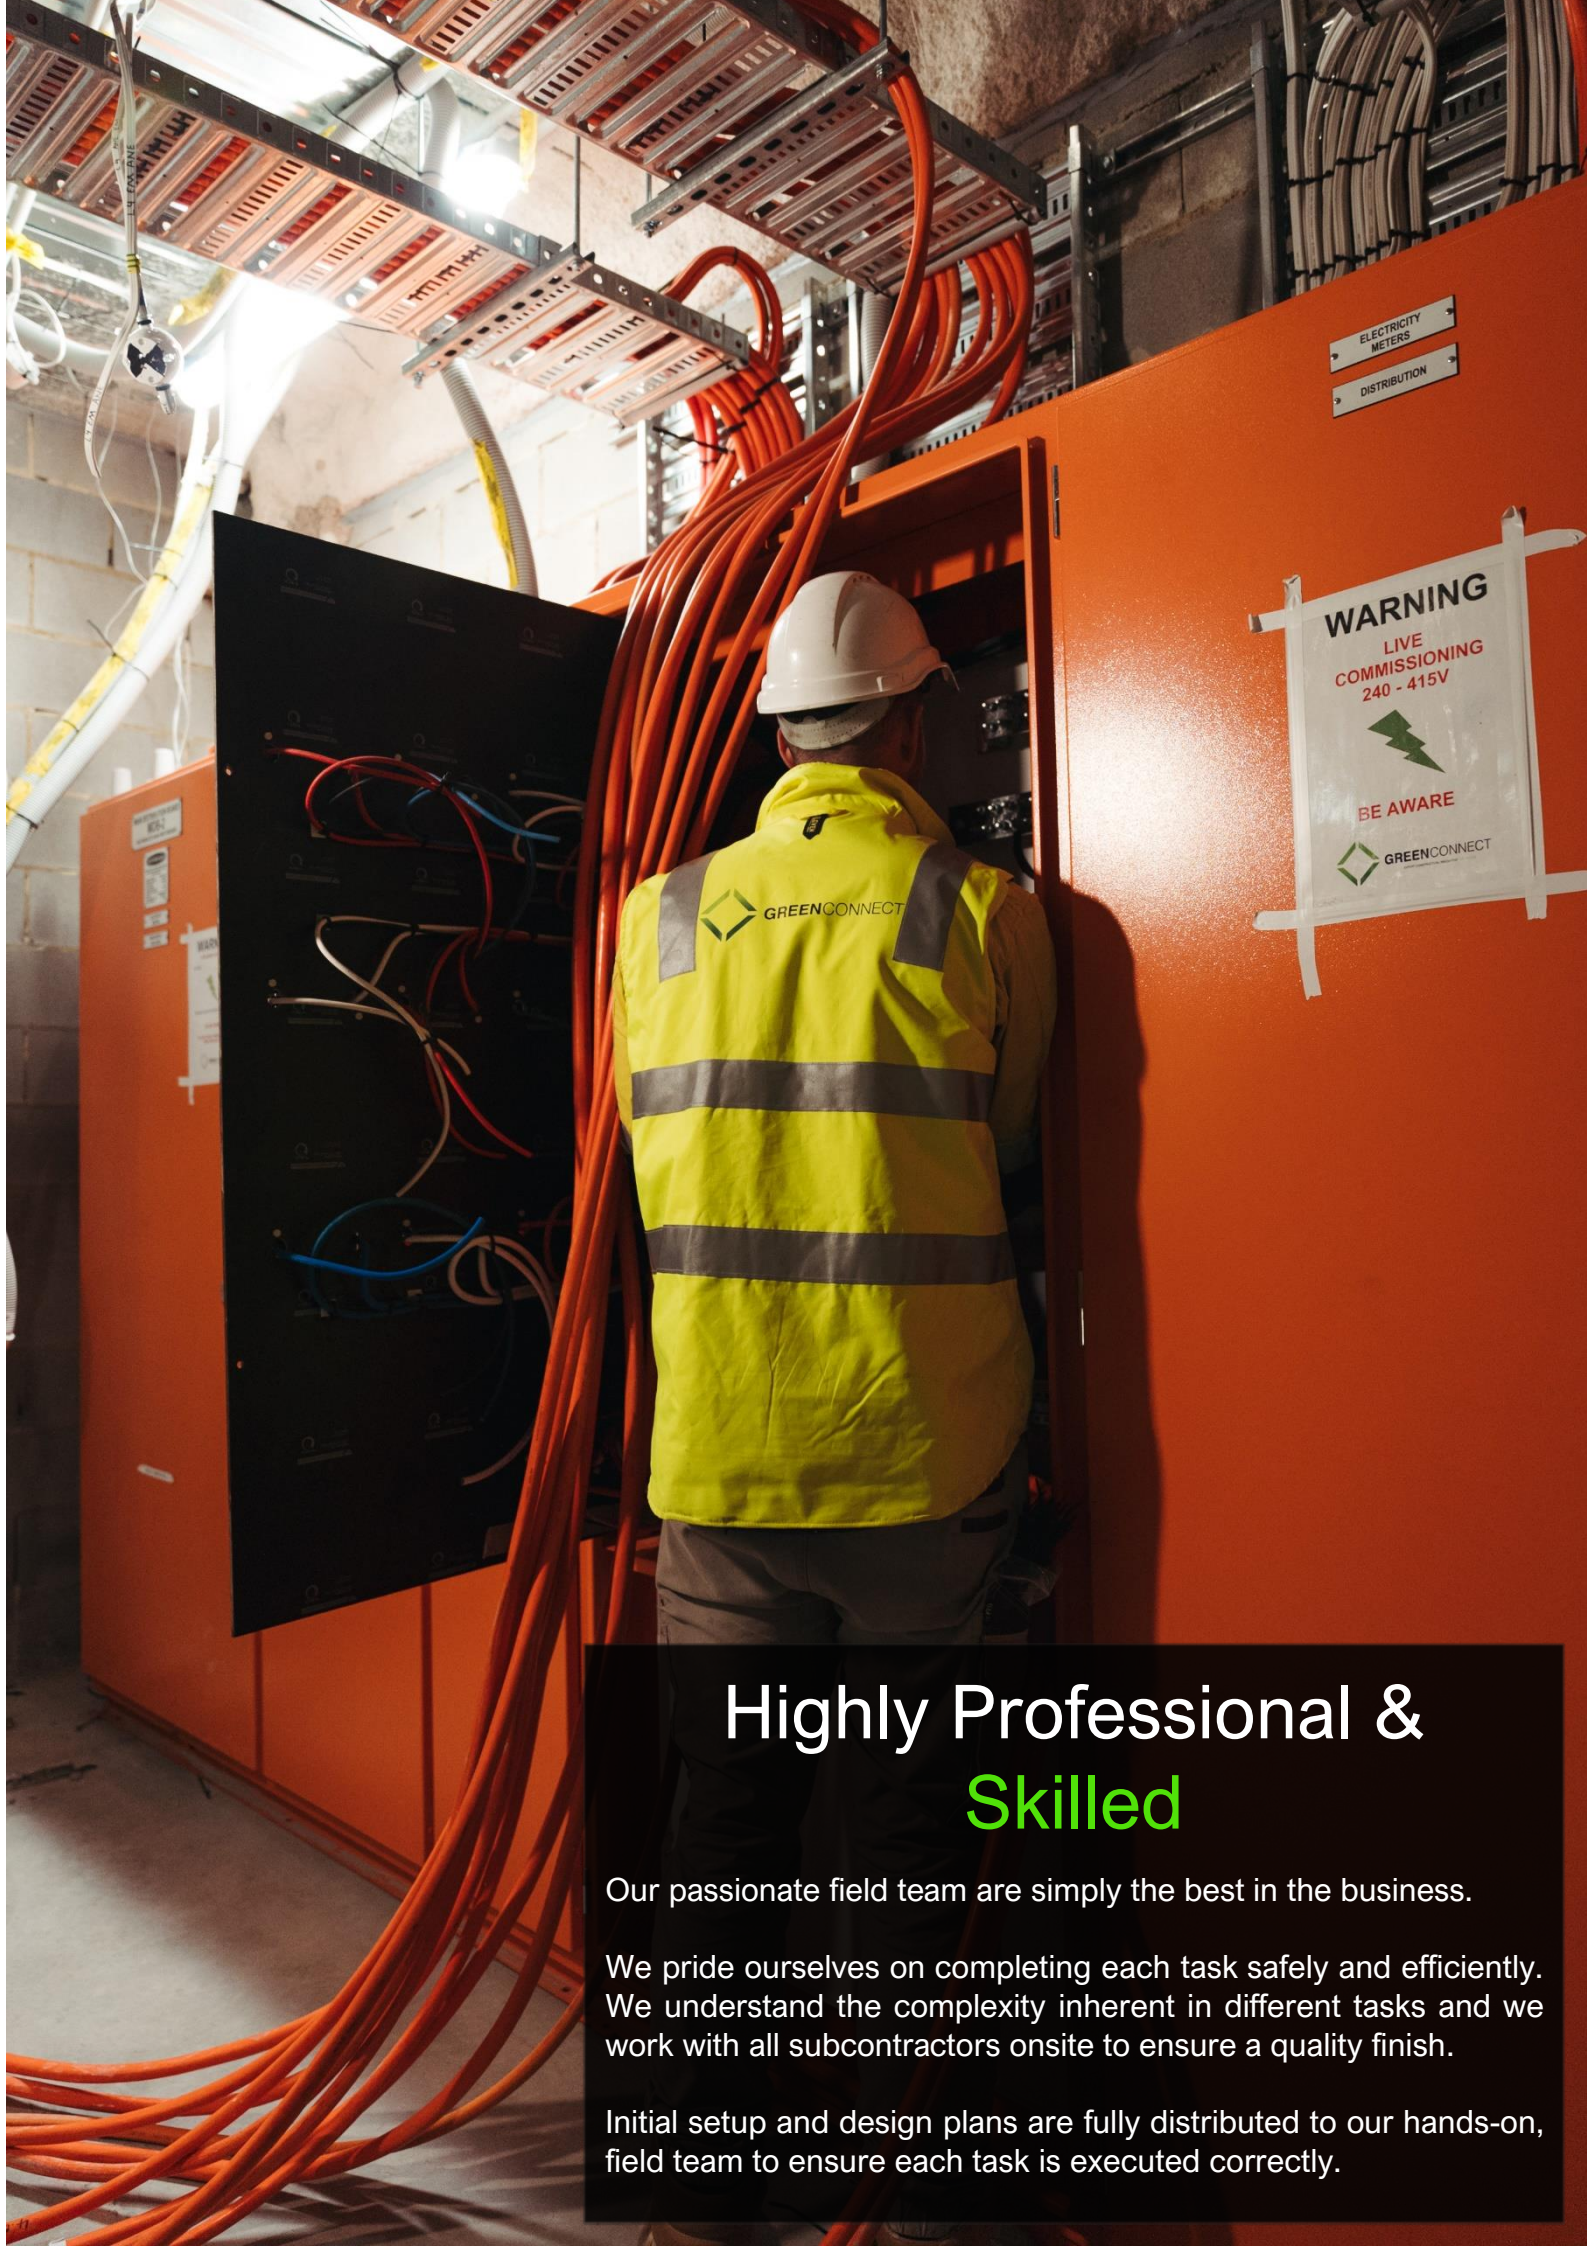

We understand the need for clear and concise communication, supported by quality-safe delivery practices. We complement this by engaging the right people, ensuring they are highly skilled and well trained.

An individual client liaison is assigned to each project for the duration, fostering open communication and ensuring consistent understanding.

We challenge ourselves to deliver value as efficiently as possible through harnessing technology as our partner.

Our team is committed to constant training and development. We pride ourselves on listening to our clients, knowing that communication and mutual understanding are key to any successful partnership.

With over 60 years combined industry experience, we guarantee our projects are completed with the quality and focus they require; delivering the best results for every one of our clients.

Highly Professional & Skilled

Our passionate field team are simply the best in the business.

We pride ourselves on completing each task safely and efficiently. We understand the complexity inherent in different tasks and we work with all subcontractors onsite to ensure a quality finish.

Initial setup and design plans are fully distributed to our hands-on, field team to ensure each task is executed correctly.

Our Approach to Success & Delivery

Representing the relationship between sustainability and connections, Green Connect lives toward these values daily, striving to improve the future.

We appreciate each client is unique and requires a tailored approach throughout the life of the project. Our team understand the importance of client specific needs to ensure successful project delivery every time.

We realise complicated projects can present new challenges, and our team thrive on providing solutions and problem-solving strategies.

Our continued exceptional safety record and quality control processes ensures clients a strong sense of confidence they are working with a professional, future-driven, electrical contractor.
